Atlas of the Basque Country (Atlas du pays Basque)

La Geste. 2019. Niort, France. 94 pages. ISBN: 9791035302528. In French.

This book presents 16 towns and villages representative of the Basque Country from the angle of beautiful "flora-architecture" associations. It allows you to discover a number of buildings evocative of the region by looking through the trees and shrubs that have managed to adapt harmoniously to the mild and humid climate of the Basque Country. In the form of "walks," all of the photos presented in this book allow us to fully understand the richness and diversity of the exceptional "plant-mineral" heritage of these places. An introduction to typical architecture and local flora is offered. Numerous historical and geographic data complete the presentation.

Hasidism: Historical Atlas (Chasydyzm : atlas historyczny)

Austeria. 2019. Krakow, Poland. 296 pages. ISBN: 9788378663089. In Polish.

This atlas is the first cartographic visualization and interpretation of the mystical Hasidic movement, one of the most important religious movements of Central and Eastern Europe, modern Israel and North America. In nine chapters, the work discusses the rise and expansion of Hasidism, its institutional forms (dynasties, courts, prayer houses), 20th-century emigration to the New World, the crisis of the two World Wars and the Holocaust, and finally the revival after 1945. 74 large-format and full-color maps with accompanying text, 99 illustrations, charts and tables present the spatial, physical and visual dimensions of the Hasidic movement in a visually attractive, easy to understand form. What's more, the atlas shows the significant relationships between the spatiality and spirituality of the movement - Hasidism is determined by its geographical features not only in social organization but also in spiritual life, type of religious leadership, and cultural articulation.

20-02-010 | \$57.00 | [PURCHASE](#)**Atlas of the Sea in the 21st Century: The Earth is Blue**Ediciones Catedra. 2019. Madrid, Spain. 192 pages.
ISBN: 9788437639994. In Spanish.

This book is the first atlas that presents our world from the point of view of the sea. It is the sea that will allow humanity to face the main challenges that await us. How to feed the 9 billion human beings the world will have in 2050, how to supply the energy they will need, and, above all, how to achieve it without endangering our planet. Fifty unpublished maps and infographics show us how the incredible potential wealth of the oceans can respond to these challenges: sustainable aquaculture, blue energy, new cancer treatments, underwater housing.
